Source 1 Sketch map of community woodland

- Key
- | | |
|-----------------------------|-------------------------------------|
| non-native conifer woodland | community woodland area |
| mixed native woodland | area damaged by Storm Arwen |
| access road | pylon electricity transmission line |
| rough, grassy path | car park |

Source 2 A photograph of damage caused by Storm Arwen

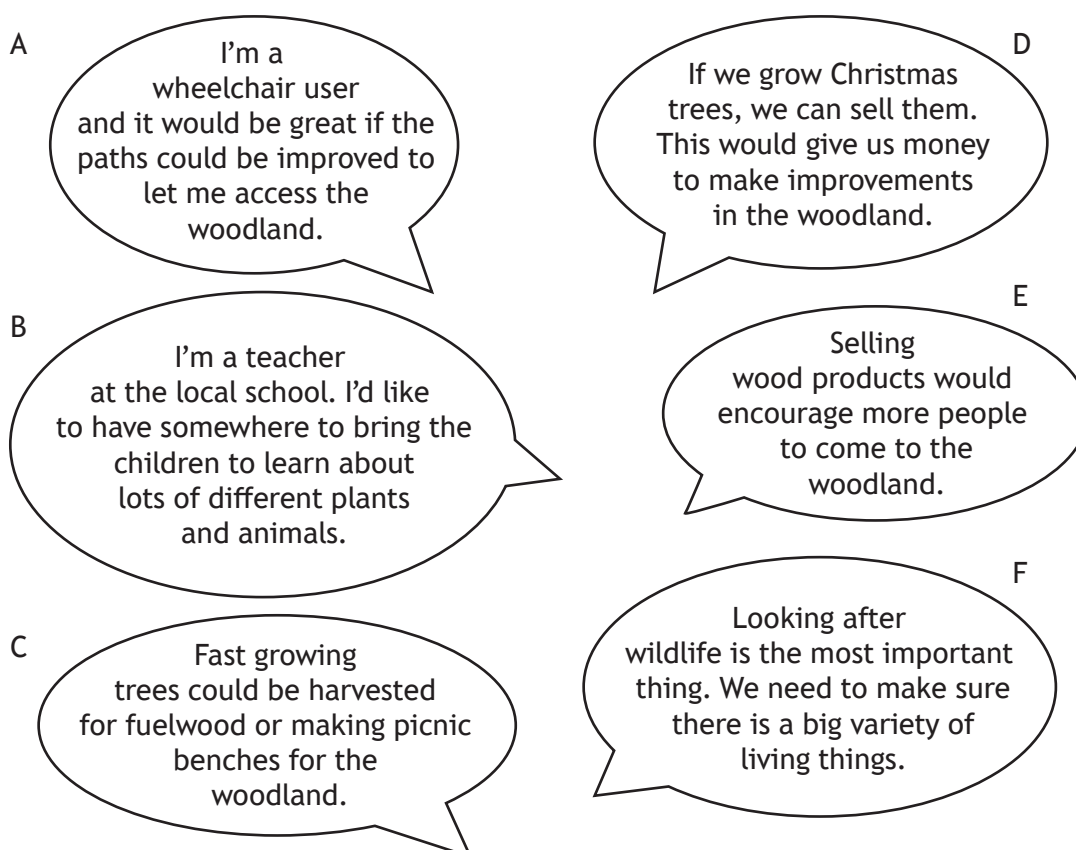

Source 3 Aims of the Community Woodland Scheme

The aims of community woodlands are identified by people in the local community. These aims are based on local priorities and needs.

Scotland's community woodlands deliver a huge range of public benefits including:

- recreation — for example, providing paths, mountain bike trails, and orienteering courses
- biodiversity and conservation — restoring and expanding native woodlands, carrying out habitat improvements within other forest types, conserving and enhancing Scotland's biodiversity, and reducing the impact of climate change
- economic development — increasing the value of forestry to local communities, creating jobs, and developing forest timber products
- renewable energy — developing markets for fuelwood, to help reduce dependence on fossil fuels
- social inclusion — involving all sections of the community in planning and decision-making and ensuring that the benefits of community woodlands are available to all.
